Showdown — Walnut & Felt

DESIGN PROPOSAL · OCT 2026

The brief

Give the current game the look of the reference mock-ups: a lamp-lit walnut room, a deep felt table with a wood rail, serif table names, mono numbers and gold calls to action. **The rules stay exactly as they are**: five-card hands, kicker, forge, bail, pressure, the house's five-card climb, Duke and Gus.

Taken from the reference

- **Walnut top bar**: back, table name in italic serif, ante in mono, rules and menu.
- **Gold status chip** under the title: whose turn it is.
- **A real table**: chip tray, shoe, ante placard, curved rules lettering, wood rail at the near edge.
- **Seat labels** beside every player's cards, naming their move.
- **Big hand badge** on your own hand.
- **Result sheet**: line-by-line ledger, the bots' outcomes, one gold button.

Kept from today

- **Readable at arm's length**: nothing under 14 dp, body 17–19 dp. The reference runs smaller; we don't.
- **Touch targets 54 dp+**: Bail, Forge and Hold stay on screen as real buttons.
- **Both prizes always visible**: table pot and vs-house share one pill.
- **Every button says where the chips go**: "get 10 back", "pay 10 · 2 left".
- **No real-money cues**: plain chip counts, no $ signs.

Building it in Unity

- **Fonts**: bundle Cormorant Garamond, Cormorant SC, DM Mono and Manrope (all SIL OFL) beside Noto Sans in `Resources/Fonts`. Suits stay drawn shapes.
- **Felt and rail**: `TableScreen.BuildRail/BuildFelt` gain a curved near edge; curved lettering is a baked texture.
- **New parts**: TopBar restyle, `SeatLabel`, `PotPill`, `HandBadge`, `ResultSheet`, tray and shoe decor. Rules, controller and tests are untouched.
